

The Symbol of Excellence

# COMMERCIAL RADIATORS

## Comprehensive Reliability

### **COMMERCIAL AUTO PRODUCTS PRIVATE LIMITED :**

The tenacity that reflects in the performance of highest standards.

The initiative that ensures positive results. The efficiency that gives a cutting edge.

Successfully combining professional management with dynamic strategy, Commercial Auto Products Private Limited was started modestly in 1987. Since then it has come a long way. Registering an inspiring growth, it has marked a niche amongst the most enterprising industrial units.

Set in myriad surroundings, on a neatly landscaped seven acre plot, Commercial Auto Products Pvt. Ltd. is fast becoming the flag bearer of the group of companies having diverse interests in automobile dealerships, and a turnover of over Rs. 100 crores.

The automobile industry in India is growing in leaps and bounds producing not only vehicles that give entire customer satisfaction but also those that are cost effective, aesthetically attractive and durable.

A chain reaction has set in due to the growth in the automobile industry and has engulfed the entire automotive component manufacturing units to meet the rigorous demands made by the OE manufacturers in terms of low cost products of superior performance.

We at Commercial Auto Products are successfully meeting the increasing requirements of the OEM market.

# COMMERCIAL RADIATORS

Sophisticated in-house facilities as well as a strong team of professionals not only maintain the strictest Quality Control measures but also produce Quality Products.

Stringent laboratory tests on raw material ensures that only the best material is good enough for us.

Quality and perfection is given top priority. These aspects have enabled us to develop and manufacture

## TEMPERATURE PROFILER

Datapaq profiling system is used to regularly monitor furnace conditions to ensure the brazing profile is within specification.

every component that goes to make up a rugged, and cost effective cooling system of optimum performance.

A fine tool room and a fully equipped modern Press Shop has enabled prompt development of complex tools and dies for the mass production of radiators.

The Wind Tunnel, Vibration Rig, Corrosion Test Rig etc. has not only enabled the development of the most optimum design backed by computerised Heat Transfer calculations, but also a sound radiator of extended durability.

Our radiators have not only helped to produce more efficient vehicles, but by streamlining our designs we have managed to save on valuable materials.

## VIBRATION SHAKER

1500 KgF - 3 dimensional electrodynamic vibration shaker.

We manufacture brazed aluminium radiators, charge air coolers and oil coolers. Commercial Radiators products are used in OEM & Aftermarket for the following industries:

- Agricultural Equipment
- Construction Equipment
- On-Highway Trucks
- Diesel Engines
- Automotive and Light Truck Applications

We deliver consumer-driven technology solutions to automotive manufacturers worldwide. Our brazing line keeps the highest quality standards, bringing you superior products you can rely on.

We continually test and develop innovative designs and processes to more efficiently cool an engine.

Commercial radiators are designed for each vehicle's specific engine-cooling needs and are manufactured from premium materials. Using the latest breakthroughs in fin, tube and header design, thermal cycle, pressure cycle durability and vibrational resistance.

Commercial Auto manufactures all of the individual components that make up a module assuring complete system understanding and integration.

We constantly strive to reduce manufacturing process and increase efficiency to stay competitive in an increasingly global marketplace. Continuous Improvement is a consistent objective at all levels.

# COMMERCIAL RADIATORS

We at Commercial Auto Products have placed a high premium on development of human resources both mentally and physically. Sports and games are a part of the work ethos.

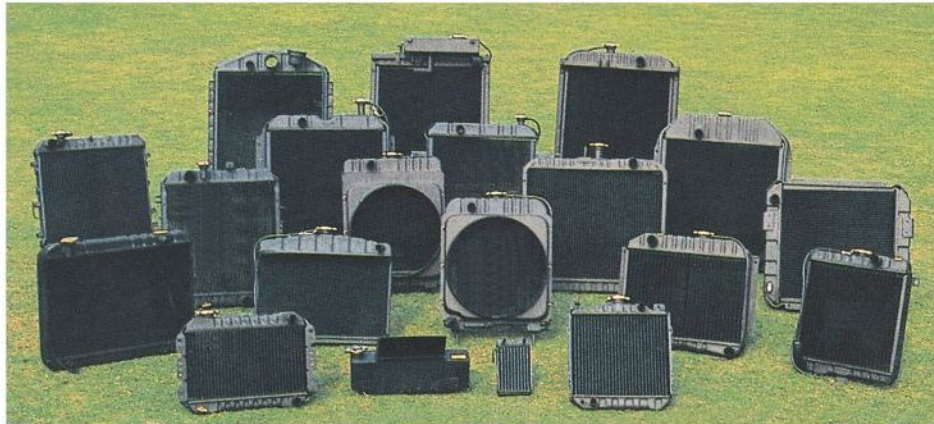

The Kaizen Club has helped to develop employee skills and their thought processes by exposing them to the latest developments in the radiator field.

At the threshold of the 21 st century our continuous quest for improved designs and better radiators has no limit.

We look forward challengingly at the future with a set goal in the hearts of every Employee "Strive To Improve, Improve To Produce & Produce Only Quality Products."
